timed: kernel + someone else's write-back
(a) Write flush
flush: write buffer
kernel
+ write-back of the flush's dirty lines
timed: kernel only
(b) Read flush
flush: read buffer (lines stay clean)
kernel
written back during the next flush: never timed (cold mode)
(c) Read flush, next call
kernel
its output written back (flush time)
flush (read)
next kernel
time →
